

Indoor Carpet Advertising

White Opaque Base Film

Experienced marketers understand that by placing advertisements on indoor carpets near their products can improve lift rates. While quality carpet graphics can make a great impression, poor ones can make a bad one.

Pressure-sensitive films for carpet advertising must be able to withstand the wear and tear of heavy pedestrian traffic. They must meet or exceed industry accepted standards for slip resistance. And the adhesives must be strong enough to hold the graphic in place, yet be easily removed after the promotion. When done right, carpet graphics deliver.
